CAREER OBJECTIVE

A Final - Year Computer Science and Engineering student aspiring to become a Java Developer with a strong interest in web development and building creative software solutions. Possesses a solid foundation in java, Object-Oriented Programming (OOP) and web development. Seeking opportunities to develop scalable applications and contribute to meaningful software development projects.

EDUCATION

- Bachelor's degree at Computer Science and Engineering (CGPA: 7.82/ 10.0)
Nandha Engineering College 2023 – 2027
- HSC – Computer Science
SVV Matric and Higher Secondary School 2023 (75.33%)
- SSLC
Shree Venkateshwara Vidyalaya Matric School 2021 (100%)

PROJECTS

Employee Management System:

Built a full-stack Employee Management System for managing employee records, attendance, leave applications, departments, and salary details. created a responsive admin dashboard with CRUD operations, search, filtering, role-based authentication, employee profiles, leave approval, and salary tracking. Engineered RESTful APIs and integrated MongoDB for secure, efficient data management using React.js, Node.js, and Express.js.

DL - based Air Quality Index(AQI) prediction:

Engineered a Deep Learning based AQI Prediction system based on RNN, ANN, LSTM, GRU models for AQI classification and prediction. Applied data preprocessing, feature scaling and sequence generation to boost model performance. Designed an interactive dashboard to display AQI levels and its prediction results. Integrated Bluetooth Low Energy (BLE) module for real-time notifications upon exceeding the set threshold value to provide real-time awareness and monitoring of the user.

TECHNICAL SKILLS

HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB, Java, MySQL, Git, Linux, Docker, AWS.

INTERNSHIP

Full Stack Web developer at Twin Cord technologies

Jun 2025 – Jul 2025

Worked as a Full Stack Web Developer Intern, developing web-based solutions and gaining hands-on experience in building responsive front-end applications, developing RESTful APIs, and managing databases. Acquired practical experience in solving real-world software development problems.

CERTIFICATIONS

- | | |
|-----------------------|---|
| Front end development | Completed an introduction to Frontend Development course from skilllearn. |
| Cloud Practitioner | Completed an AWS Cloud Practitioner course on Udemy. |
